

ARCTIC STEAMER

This rugged, dependable steamer combines mobility with extreme ice melting power!

Use an Arctic Steamer to make money in the winter and find clients for the summer months. American Pressure is glad to demonstrate the equipment and will train you on the proper use and winterization of equipment so you can use it to remove ice all day every day.

American Pressure is the leader in ice dam removal equipment and we recommend using steam. Stop in or call for more information.

Why Use Steam to Melt Ice:

- Lower pressure so it won't damage roofing material
- 290° steam means less water run-off & faster ice removal
- Easy to hold wand – balances in your hand!
- No hammering or pounding means piece of mind for your customers.
- Equipment can be used at temperatures well below freezing.
